Determiner

There is one definite determiner: -λ. The numeral ογελ may be used as indefinite determiner, but is not necessary.

- (1) a. εῤῥ-λ 'the woman'
b. εῤῥογ (ογελ) 'a woman'

Determiner

The definite determiner nearly always appears in the context of a nominative, as it is dropped before any other case marking.

- (2) L 113.2–5 [εις]cñ ΔΟΔΓΡΙΓΟΥΛ ΜΑΦΑΛΟΚΚΛΩ ΤΑΡΑ ΙΕΡΟΥΣΑΛΜΙΩ

Singular

The singular is unmarked in Old Nubian.

Dual

The dual is created with the suffix - $\Delta\mathbf{N}/\bar{\mathbf{n}}$ followed by the $\tau\mathbf{p}\mathbf{i}$ ‘pair(?)’, which may be marked with plural - $\Gamma\mathbf{O}\mathbf{Y}$.

The dual is attested with only a few nouns, including body parts:

- (7)
- a. $\mathbf{M}\Delta\mathbf{\Psi}\text{-}\bar{\mathbf{n}} \tau\mathbf{p}\mathbf{i}$ ‘pair of eyes’
 - b. $\bar{\mathbf{o}}\mathbf{\epsilon}\text{-}\bar{\mathbf{n}} \tau\mathbf{p}\mathbf{i}$ ‘pair of feet’
 - c. $\Delta\mathbf{Y}\mathbf{P}\text{-}\Delta\mathbf{N} \tau\mathbf{p}\mathbf{i}$ ‘pair of wings/shoulders’
 - d. $\mathbf{O}\mathbf{Y}\mathbf{L}\mathbf{G}\text{-}\Delta\mathbf{N} \tau\mathbf{p}\mathbf{i}$ ‘pair of ears’
 - e. $\mathbf{K}\mathbf{O}\text{-}\Delta\mathbf{N} \tau\mathbf{p}\mathbf{i}$ ‘pair of dominions (i.e., Makuria and Alwa)’
 - f. $\tau\mathbf{X}\mathbf{L}\text{-}\bar{\mathbf{n}} \tau\mathbf{p}\mathbf{i}$ ‘pair of (heathen) gods’

Dual

Especially the dual for ‘gods’ is pretty wild:

- (8) SC 21.3–4 τᾱριῶ ὄο[κκ]ᾱ καπεσοῦν οὔκοῦρρω⁰ τᾱλῆν τρε

Plural

There are two sets of plural suffixes.

The first set includes the most common plural suffix is -ṛoγ. It not obligatory if plurality can be inferred from context.

- (9)
- a. oγpoγ-ṛoγ 'kings'
 - b. ʒaβm-oγṛoγ 'heavens'
 - c. Δaε-ikoγ 'fish (*Cyprinus lepidotus*)'

Plural

The second set comprises suffixes ending in -i: -pi, -ni, -li, -i. These are lexically determined and obligatory.

- (10)
- a. ἰοϣΔαιῶς-ῖ 'Jews'
 - b. τῖ-νῖ 'cows'
 - c. ὄεμ-λῖ 'years'
 - d. σῖπῖ-ε 'nations' < *σῖπῖ-ῖ-α

They commonly occur in combination with -γοϣ.

- (11)
- a. μοϣτ-ῖ-γοϣ 'dogs'
 - b. οϣκῖ-ῖ-γοϣ 'days'
 - c. σαχχ-νῖ-γοϣ 'anchorites'

Plural

There are a few irregular plurals.

- (12) a. ειλ 'woman, wife', pl. ειλιογ
b. τοτ 'child', pl. τογφ
c. ε̄κκΔ-αττ 'prophet', pl. ε̄κκΔ-αει

Structural Cases

Structural cases mark the main semantic roles in a sentence: subjects, direct objects, and indirect objects. Old Nubian has a nominative–accusative case marking system, meaning that subjects of transitive and intransitive verbs are marked with the same structural case.

- (13) **Nominative** -∅ Subject of intransitive verb; agent of the transitive verb
- Genitive** -n(λ) Subject of intransitive verb; agent of the transitive verb in non-coreferential attributive relative clause, possessor
- Accusative** -κλ Patient of transitive verb, animate recipient of ditransitive verb, duration
- Dative** -λλ (In)animate recipient of ditransitive verb, location, direction, time

Lexical Cases

Lexical cases mark adjuncts in a sentence

- (14) **Locative** -λo Direction, location, time; may be followed by a large number of postpositions

Allative -rλ̄(λe) Direction

Supressive -Δo Location above/upward direction

Subsive -ΔoN/ΔoN Location below/downward direction
(rare)

Vocative -o Addressee (rare)

Comitative -Δλλ 'With' or 'against' (rare)

Adessive -Δe 'Adjacent/next to' (rare)

Position of Case Marking

Case marks the end of the entire noun phrase.

- (15) M 10.4–6 $\mu\alpha\lambda\eta \Delta\pi\pi\iota\lambda\alpha\epsilon\iota\omicron\upsilon\eta\eta \pi\alpha\rho\theta\epsilon\upsilon\eta\omicron\varsigma\omicron\upsilon\gamma \epsilon\bar{\iota}\varsigma\varsigma\omicron\upsilon\gamma \mu\alpha\rho\iota\alpha\eta\eta \kappa\bar{\epsilon}\varsigma\epsilon\lambda\lambda\omicron$

Denominal Postpositions

There are two types of postpositions: denominal and deverbal postpositions. Denominal postpositions derive from nouns. They may follow a locative case -λο, but are also attested after other cases and the determiner.

- (18)
- DET + αγῶ/αγᾶ ‘within’
 - DET/LOC + καλο ‘downstream, after’
 - GEN + κελλικα/κεεκα ‘as, according to’
 - LOC + μαλο ‘according to’

Deverbal Postpositions

Deverbal postpositions derive from verbal roots. They follow a locative case -λo.

- (20)
- LOC + κ̄κ̄λ̄ ‘until, up to’
 - LOC + κo ‘by, through’
 - LOC + κono/κona ‘after’
 - LOC + τapa ‘from’

Attributive Relative Clauses

Like adjectives, attributive relative clauses usually follow the noun. It is possible to relativize the subject:

(25) απογγοϋ εικκα οϋλγρῶ

apoggou eik-ka oulgr-il

boatsman 2SG-ACC hear-PRS.DET

‘the boatsman that hears you’

Attributive Relative Clauses

Like adjectives, attributive relative clauses usually follow the noun. It is possible to relativize the subject:

(27) απογγοϥ εικκα οϥλγρλ̣

apoggou eik-ka oulgr-il

boatsman 2SG-ACC hear-PRS.DET

‘the boatsman that hears you’

And to relativize the object:

(28) απογγοϥ ειinna οϥλγρλ̣

apoggou ein-na oulgr-il

boatsman 2SG-GEN hear-PRS.DET

‘the boatsman that you hear’

NB: in non-coreferential (object-relativizing) RCs, the subject of the RC is marked with genitive!

Attributive Relative Clauses

When they precede the noun, they have a restrictive reading.

(29) *einna oulgr̄l apogḡl*

ein-na *oulgr-il* *apogg-il*

2SG-GEN hear-PRS boatsman-DET

‘the boatsman that you hear’ (rather than the boatsman you don’t hear – restrictive reading)

Attributive Relative Clauses

When they precede the noun, they have a restrictive reading.

(31) εΙΝΝΑ ΟΥΛΓΡῸ ΑΠΟΓΓῸ

ein-na oulgr-il apogg-il

2SG-GEN hear-PRS boatsman-DET
